

IEEE SA - 1872.2 Standard for Autonomous Robotics (AuR) Ontology Working Group

Call and Agenda

Meeting Agenda for March 12, 2020, 1PM-2:30PM UTC

You have been invited to the IEEE SA WG P1872.2 meeting. Join the meeting:

<https://join.skype.com/Buruz9jby49e>

1. Call to order (Howard)
2. Introduction and rosters (Alberto)
3. Approve today's agenda (Howard)
4. Approve prior meeting's minutes (Alberto; February 13)
5. Essential Patent Claims (Alberto)
6. Status updates/previous action items (Howard)
7. IEEE Copyright Policy (Howard)
8. Technical discussion (OWL implementation of current vocabulary)
9. Next meeting's topic: nomination of presentation
10. New business/announcements/events/last thoughts
11. Close meeting (Howard)

Minutes for the Official Meeting on March 12, 2020

Alberto Olivares-Alarcos transcribing

Rosters

- Y and N state for Yes and No
- ^ means the attendee is a *Voting Member*
- Members highlighted in **green** are eligible to become a *Voting Member*
- Members highlighted in **red** are eligible to lose *Voting Membership*
- Last column contains today's meeting attendees

Attendee Name	Role	Affiliation	Current Voting	Meetings Attended / last two	12-Mar
OBSERVATIONS					
Howard Li	Chair	University of New Brunswick, Canada	Y	2	Y^
Paulo Gonçalves	Co-Chair	IDMEC, Portugal	Y	2	Y^
Veera Ragavan	Co-Chair	Monash University, Australia	Y	1	Y^
Alberto Olivares Alarcos	Secretary	IRI-CSIC, Spain	Y	2	Y^
Alaa Khamis	Member	General Motors, Canada	N	1	Y
Chris Nowak	Member	DST Group, Australia	Y	2	Y^
João M.L. Quintas	Member	Pedro Nunes Institute, Portugal	Y	2	Y^
Julia Bermejo	Member	UPM, Spain	Y	2	Y^
Ricardo Sanz	Member	UPM, Spain	N	1	N
Stefano Borgo	Member	ISTC/ CNR, Italy	N	1	Y
Edison Pignaton	Member	UFRGS, Brazil	N	1	Y
Elisa Tosello	Member	UNIPD, Italy	N	0	N
Daniel Beßler	Member	University of Bremen, Germany	Y	1	N^
Mohammed Diab	Member	UPC, Spain	Y	2	Y^
Marcos E. Bareto	Member	UFBA, Brazil	N	0	N
Bao U. Nguyen	Member	University of Ottawa, Canada	N	0	N
Joanna I. Olszewska	Member	University of West Scotland, UK	Y	2	N^
Amelie Gyrard	Member	Knoesis, Wright State University	Y	1	Y^
Edson Prestes	Member	UFRGS, Brazil	N	0	N
Sandro R. Fiorini	Co-Chair	IBM, Brazil	N	0	N

Minutes for the Official Meeting on March 12, 2020

Alberto Olivares-Alarcos transcribing

Joel L. Carbonera	Co-Chair	UFRGS, Brazil	N	0	N
Hiren Nakawala	Member	University of Verona, Italy	Y	0	Y^
Carlos Hernández	Member	TU Delft, Netherlands	N	0	N
Abdelghani Cibani	Member	UPEC, France	Y	1	N^
Eren Erdal Aksoy	Member	Halmstad University / Volvo	N	0	N
Dormant/Inactive					
Kathryn Bennett	Guest	IEEE-SA	N		
Craig Schlenoff	Member	NIST	N		
Jaeho Lee	Member	University of Seoul	N		
JiSang Hoon	Member	KITECH, Republic of Korea	N		
Ki-Yeop Sung	Member	KAR, Republic of Korea	N		
Taeyoung Uhm	Member	KIRO, Republic of Korea	N		
Sebastian	Guest	IEEE-RAS	N		
Christy Bahn	Program Manager	IEEE-SA	N	1	
Signe Redfield	Guest	United States Naval Research Laboratory	N		
Ali Akbari	Guest	UPC, Spain	N		
Total Attendees					13
Voting Members			13	0	13
Voting Members Present					10
Quorum					Y

Hiren could have lost his voting membership but he attended the meeting.

Approval today's meeting agenda

Motion Proposal : Howard

Seconded by: Alberto

Accepted Agenda: Yes

Approval prior minutes

Minutes were distributed and also made available on our google drive. Thus, members could have read them, but Alberto summarized the minutes to ensure that everyone knew about them.

Motion Proposal: Alberto

Seconded by: Howard

Accepted Minutes: Yes

Call for Essential Patent Claims (Alberto)

Done

Status updates/previous action items (Howard)

- Papers accepted at KER (Survey and Industry 4.0)
 - Survey on Ontologies for Robotics Automation.
 - Already published online ask for a copy to any of the authors
 - Industry 4.0
 - Paper already published as open access
- Focus on case studies to validate the vocabulary
 - **Mohammed's (we are working on it now)**
 - Amelie
 - Chris
 - FAiNDER (a company) which will use our standard in a Humanitarian Robotics scenario (landmine detection)
- Christy Bahm asked as to start working on the draft for the standard
- In person meeting at **ICRA 2020** in Paris, **Sunday May 31, 9:30AM-2PM in room 234/235M**. Paulo, Alberto, Julia, Mohammed, Stefano, Christy, Hiren, Abdelghani, among others, have shown interest. No need to register for ICRA. Possible to ask for money to IEEE to travel
- Attracting industrial partners
 - FAinDer (already contacted and accepted, the CEO will join to our group)
 - KUKA (potential)
 - General Motors (they are already happy using SAE standard)
 - Veera got in touch with people from both OPCA and VDMA interested in collaborating with us. He will keep us updated about it
- Cloud Robotics' paper conditionally accepted to the minor comments from reviewers:
 - Submitted to **Journal of Ambient Intelligence and Humanized Computing**, Special Issue on "Internet of Things for Everyday Living: Ubiquitous Intelligence at Scale"
 - We discussed the minor comments of the reviewers during today's meeting. Our suggestions were written on a google document that Edison has created to answer the reviewers concerns.

Copyright Policy (Howard)

Done.

Howard went through some slides about the copyright policy of IEEE. This policy is relatively large so we are not going to include all the material here, but two key points must be kept in mind:

- Anything (verbal or written) we discuss we need to make sure it has not copyright, if it has, we cannot discuss it during the meeting without official permission from the copyright holder.
- Whenever you bring some material to the group and it is discussed along with our meetings, you are granting the copyright of it to the IEEE. Either if you are the holder or your affiliation center is the holder. In the later case, you would need permission from your company or university. Note that when something which has copyright it is discussed during our meetings (sometimes permission would be needed), automatically, the copyright license will be granted to the IEEE. Note that anything developed during our group work, will have a copyright license owned by IEEE once the standard gets published.

Technical discussion

Topic: Mohammed's Case Study to validate the Standard's Vocabulary

Extension of his previous work where two robotic arms perform a collaborative pick-and-place task. In the new proposed scenario, another robot, with both manipulation and navigation capabilities (Tiago - PAL Robotics) enters in the loop, extending the capabilities of the other two static arms. We had no comments on it so he will start working on the technical details of his proposal throughout September. **Mohammed** in charge. **LAST UPDATE [SEP-26]:** Waiting for the rest of actions listed below, then, Mohammed will include the vocabulary in his framework. It is fundamental to keep in mind we cannot publish any content of the future standard before it is published.

The current draft of the Standard already contains some definitions of Classes, however, the current version of the file contains a lot of details (from the discussion along the past months). We plan to reduce the document to have a single definition and example per term. **Stefano** will do this. **LAST UPDATE [SEP-12]:** Stefano already cleaned it, the previous work was put at the end of the document (just in case someone wants to see the discussions) and the section now only contains one single definition per term and examples. Stefano defined a new term which was not before 'action' so we discussed it. Specifically, the notion of 'intentionality' which is part of the definition of action was controversial, Stefano will continue thinking of it. The conclusion was: action will be defined from a neutral perspective and then have a specialisation of it which captures intentional actions.

Minutes for the Official Meeting on March 12, 2020

Alberto Olivares-Alarcos transcribing

We have only defined Classes in our first draft of the Standard, but not Relationships (in OWL, properties). The idea is to identify which ones are already defined in the IEEE 1872:2015 and come up with those which are not there and are necessary for us. During August and September, **Alberto**, **Paulo** and **Veera** will work on it offline (help is always welcome). **LAST UPDATE [SEP-12]: Done and presented on September 6**

Once we have done all the previous work, we can start writing the OWL file (we will need someone to do so, volunteers are welcome). **LAST UPDATE [SEP-26]: Mohammed showed us his work in progress. We discussed the terms of: Time, TimePoint, TimeInterval, Environment, Event and Region.**

PREVIOUS INTERESTING INFORMATION - Mohammed pointed out a recurrent issue we have discussed before, some of the terms within the proposed vocabulary were taken from SUMO in the previous standard (e.g. artefact, etc.). Our conclusion is that those inconsistencies will be fixed afterwards. We want to make SUMO optional.

We need to use the previous standard but we agreed to make SUMO optional. We could delete SUMO from the OWL file but this is not straightforward. Hence, we proposed to directly take the concepts we need from CORA (e.g. Robot) and put it in our OWL file always being congruent with the standard but not necessarily with SUMO.

LAST UPDATE during today's meeting: (1) Modelling the ontology. Mohammed is working on the implementation offline together with Stefano. They will work on having ready the OWL file for the current vocabulary and present it to us when the work is more advanced. It probably will be ready within the next few weeks. (2) Modelling the scenario in task-motion planning simulation. Mohammed has prepared a simple simulation of the scenario. We will query the knowledge base during the task-motion planning process to check for instance, the capabilities of the robots. Mohammed proposed some query examples during the meeting: e.g. 'in which object the user drinks coffee/coke?'

Chris sent an email with a proposal that will be discussed offline between Mohammed and him. *'So, the claim that I'm making is this: you could formalise your scenario using "detects" and "transports"; alternatively, if you wanted to be more specific, you could use the primitive relations "emits", "senses" & "interprets" (which can be used to define "detects"), and "attaches", "detaches" (negation of "attaches") & "moves" (which can be used to define "transports").'*

Topic: Other cases study to validate the Standard's Vocabulary

We could use other case studies from our papers:

Minutes for the Official Meeting on March 12, 2020

Alberto Olivares-Alarcos transcribing

- Cloud robotics paper
- Human-robot interaction (ask Alaa)
- Surveillance (ask Alaa)
- Paulo could have another one with an industrial partner

Next meeting's topic: nomination of presentation

- Mohammed next official meeting: list of queries from planner to knowledge base and presentation about the ontological level of the current implementation
- Andrea (Edison's contact) about her work (robotics applied to e-health), she is a potential new group member but now she is switching jobs, so she would need more time

New business/announcements/events/last thoughts

- Found Patent from Magazino (see [here](#)) - Howard working on it
- There could be some funding for people to travel to ICRA 2020 in Paris (May 31), ask Howard or Craig. It will be possible to attend several meetings (1872.1, 1872.2, etc.). No registration needed but of course, you could not access to the conference
- IEEE-SA board's meeting in Berlin June 1-3, overlaps ICRA. Howard will attend, if you want to join, feel free to ask him for more details
- Howard had a telcom with the chair of the IEEE-SA board. He asked whether our members from industrial partners must pay a fee for being members of our working group. It seems that this is common in groups where members represent their companies but in our group we represent ourselves
- Next official meeting for April 9

Close meeting (Howard)

Adjourned 2:30 PM UTC
