

IEEE SA - 1872.2 Standard for Autonomous Robotics (AuR) Ontology Working Group

Call and Agenda

Meeting Agenda for May 7, 2020, 1PM-2:30PM UTC

You have been invited to the IEEE SA WG P1872.2 meeting. Join the meeting:

<https://join.skype.com/Buruz9jby49e>

1. Call to order (Howard)
2. Introduction and rosters (Alberto)
3. Approve today's agenda (Howard)
4. Approve prior meeting's minutes (Alberto; April 9)
5. Essential Patent Claims (Alberto)
6. Status updates/previous action items (Howard)
7. IEEE Copyright Policy (Howard)
8. Technical discussion (OWL implementation of current vocabulary)
9. Next meeting's topic: nomination of presentation
10. New business/announcements/events/last thoughts
11. Close meeting (Howard)

Minutes for the Official Meeting on May 7, 2020

Alberto Olivares-Alarcos transcribing

Rosters

- Y and N state for Yes and No
- ^ means the attendee is a *Voting Member*
- Members highlighted in **green** are eligible to become a *Voting Member*
- Members highlighted in **red** are eligible to lose *Voting Membership*
- Last column contains today's meeting attendees

Attendee Name	Role	Affiliation	Current Voting	Meetings Attended / last two	7-May
OBSERVATIONS					
Howard Li	Chair	University of New Brunswick, Canada	Y	2	Y^
Paulo Gonçalves	Co-Chair	IDMEC, Portugal	Y	2	Y^
Veera Ragavan	Co-Chair	Monash University, Australia	Y	2	Y^
Alberto Olivares Alarcos	Secretary	IRI-CSIC, Spain	Y	2	Y^
Alaa Khamis	Member	General Motors, Canada	Y	2	Y^
Chris Nowak	Member	DST Group, Australia	Y	2	Y^
João M.L. Quintas	Member	Pedro Nunes Institute, Portugal	Y	2	Y^
Julia Bermejo	Member	UPM, Spain	Y	2	Y^
Ricardo Sanz	Member	UPM, Spain	N	1	Y
Stefano Borgo	Member	ISTC/ CNR, Italy	Y	2	Y^
Edison Pignaton	Member	UFRGS, Brazil	N	2	N
Elisa Tosello	Member	UNIPD, Italy	N	1	Y
Daniel Beßler	Member	University of Bremen, Germany	N	0	N
Mohammed Diab	Member	UPC, Spain	Y	2	Y^
Marcos E. Bareto	Member	UFBA, Brazil	N	0	Y
Joanna I. Olszewska	Member	University of West Scotland, UK	Y	1	Y^
Amelie Gyrard	Member	Knoesis, Wright State University	Y	2	Y^
Hiren Nakawala	Member	University of Verona, Italy	Y	2	Y^
Abdelghani Cibani	Member	UPEC, France	N	0	N

Minutes for the Official Meeting on May 7, 2020

Alberto Olivares-Alarcos transcribing

Maki Habib	Member	American University in Cairo	N	1	Y
Dormant/Inactive					
Sandro R. Fiorini	Co-Chair	IBM, Brazil	N	0	N
Eren Erdal Aksoy	Member	Halmstad University / Volvo	N	0	N
Carlos Hernández	Member	TU Delft, Netherlands	N	0	N
Joel L. Carbonera	Co-Chair	UFRGS, Brazil	N	0	N
Edson Prestes	Member	UFRGS, Brazil	N	0	N
Bao U. Nguyen	Member	University of Ottawa, Canada	N	0	N
Kathryn Bennett	Guest	IEEE-SA	N		
Craig Schlenoff	Member	NIST	N		
Jaeho Lee	Member	University of Seoul	N		
JiSang Hoon	Member	KITECH, Republic of Korea	N		
Ki-Yeop Sung	Member	KAR, Republic of Korea	N		
Taeyoung Uhm	Member	KIRO, Republic of Korea	N		
Sebastian	Guest	IEEE-RAS	N		
Christy Bahn	Program Manager	IEEE-SA	N	0	
Signe Redfield	Guest	United States Naval Research Laboratory	N		
Ali Akbari	Guest	UPC, Spain	N		
Total Attendees					17
Voting Members			13	0	13
Voting Members Present					13
Quorum					Y

Abdelghani and Daniel lost their voting membership. Alaa and Stefano became voting members.

Approval today's meeting agenda

Motion Proposal : Howard

Seconded by: Alberto

Accepted Agenda: Yes

Approval prior minutes

Minutes were distributed and also made available on our google drive. Thus, members could

Minutes for the Official Meeting on May 7, 2020

Alberto Olivares-Alarcos transcribing

have read them, but Alberto summarized the minutes to ensure that everyone knew about them.

Motion Proposal: Alberto

Seconded by: Paulo

Accepted Minutes: Yes

Call for Essential Patent Claims (Alberto)

Done

Status updates/previous action items (Howard)

- Future publications
 - Article for RobOntics Workshop - Website: <https://robotics2020.github.io>
 - Book chapter suggested by Amelie - Architecture
 - Article about Knowledge driven design of robotic applications - Veera
- **[ONGOING]** Vocabulary development
 - Discussion about *Behavior* examples - If you have any example about using that concept in robotic scenarios, then you can contact Alberto for further instructions
 - **[NEW]** Alignment with Task Representation group - Craig suggested some action items:
 - Each group develops a document which contains all terms/concepts that they feel are within scope of their standard and any include definitions that have already been defined for those terms/concepts. This document should be shared with everyone on this email (Proposed **Due Date:** Friday, **May 15th**).
 - Each group reviews the other group's terms/concepts/definitions and identifies overlap (Proposed **Due Date:** Friday, **May 29th**).
 - For committee members, meet and try to resolve the conflict (I will schedule a meeting for **early June**).
 - Once this is resolved, we send this document to the other RAS standards working groups and see if there is any conflict with their efforts.
 - Needed to validate using case studies - Validation to see whether we need more entities or not
- Focus on case studies to validate the vocabulary
 - **[ONGOING]** Mohammed's (we are working on it now)
 - Amelie
 - Chris

Minutes for the Official Meeting on May 7, 2020

Alberto Olivares-Alarcos transcribing

- FAiNDER (a company) which will use our standard in a Humanitarian Robotics scenario (landmine detection)
- **[NEW]** Christy Bahm asked us to start working on the draft for the standard
 - Howard has started filling up the draft's template. We will split sections, feel free to read it and choose a section to work on
- **[CANCELLED]** In person meeting at **ICRA 2020** in Paris, **Sunday May 31, 9:30AM-2PM in room 234/235M**. Paulo, Alberto, Julia, Mohammed, Stefano, Christy, Hiren, Abdelghani, among others, have shown interest
- **[PAUSED]** Attracting industrial partners
 - FAinDer (already contacted and accepted, the CEO will join to our group)
 - KUKA (potential)
 - General Motors (they are already happy using SAE standard)
 - Veera got in touch with people from both OPCA and VDMA interested in collaborating with us. He will keep us updated about it
- **[ONGOING]** Cloud Robotics' paper conditionally accepted to the minor comments from reviewers:
 - Submitted to **Journal of Ambient Intelligence and Humanized Computing**, Special Issue on "Internet of Things for Everyday Living: Ubiquitous Intelligence at Scale"
 - Edison has already re-submitted the revised version of the article, addressing the reviewer's comments

Copyright Policy (Howard)

Done.

Howard went through some slides about the copyright policy of IEEE. This policy is relatively large so we are not going to include all the material here, but two key points must be kept in mind:

- Anything (verbal or written) we discuss we need to make sure it has not copyright, if it has, we cannot discuss it during the meeting without official permission from the copyright holder.
- Whenever you bring some material to the group and it is discussed along with our meetings, you are granting the copyright of it to the IEEE. Either if you are the holder or your affiliation center is the holder. In the later case, you would need permission from your company or university. Note that when something which has copyright it is discussed during our meetings (sometimes permission would be needed), automatically, the copyright license will be granted to the IEEE. Note that anything developed during our group work, will have a copyright license owned by IEEE once the standard gets published.

Technical discussion

Topic: *Behaviors and Belief-Desire-Intention (BDI) model* by Dr. Alaa Khamis

Alaa gave a presentation about some types of behaviors and the BDI model. The slides are also available together with these minutes in an extra PDF file.

Topic: Mohammed's Case Study to validate the Standard's Vocabulary

Extension of his previous work where two robotic arms perform a collaborative pick-and-place task. In the new proposed scenario, another robot, with both manipulation and navigation capabilities (Tiago - PAL Robotics) enters in the loop, extending the capabilities of the other two static arms. We had no comments on it so he will start working on the technical details of his proposal throughout September. **Mohammed** in charge. **LAST UPDATE [SEP-26]:** Waiting for the rest of actions listed below, then, Mohammed will include the vocabulary in his framework. It is fundamental to keep in mind we cannot publish any content of the future standard before it is published.

The current draft of the Standard already contains some definitions of Classes, however, the current version of the file contains a lot of details (from the discussion along the past months). We plan to reduce the document to have a single definition and example per term. **Stefano** will do this. **LAST UPDATE [SEP-12]:** Stefano already cleaned it, the previous work was put at the end of the document (just in case someone wants to see the discussions) and the section now only contains one single definition per term and examples. Stefano defined a new term which was not before 'action' so we discussed it. Specifically, the notion of 'intentionality' which is part of the definition of action was controversial, Stefano will continue thinking of it. The conclusion was: action will be defined from a neutral perspective and then have a specialisation of it which captures intentional actions.

We have only defined Classes in our first draft of the Standard, but not Relationships (in OWL, properties). The idea is to identify which ones are already defined in the IEEE 1872:2015 and come up with those which are not there and are necessary for us. During August and September, **Alberto**, **Paulo** and **Veera** will work on it offline (help is always welcome). **LAST UPDATE [SEP-12]:** Done and presented on September 6

Once we have done all the previous work, we can start writing the OWL file (we will need someone to do so, volunteers are welcome). **LAST UPDATE [SEP-26]:** Mohammed showed us

Minutes for the Official Meeting on May 7, 2020

Alberto Olivares-Alarcos transcribing

his work in progress. We discussed the terms of: Time, TimePoint, TimeInterval, Environment, Event and Region.

PREVIOUS INTERESTING INFORMATION - Mohammed pointed out a recurrent issue we have discussed before, some of the terms within the proposed vocabulary were taken from SUMO in the previous standard (e.g. artefact, etc.). Our conclusion is that those inconsistencies will be fixed afterwards. We want to make SUMO optional.

We need to use the previous standard but we agreed to make SUMO optional. We could delete SUMO from the OWL file but this is not straightforward. Hence, we proposed to directly take the concepts we need from CORA (e.g. Robot) and put it in our OWL file always being congruent with the standard but not necessarily with SUMO.

Potentially, the scenario could be finished by July. Mohammed will do some work on integrating the concepts we need from CORA and finish other pending and partially done tasks. Alaa offered himself to help with PDDL, Elisa and Alberto also offered help.

LAST UPDATE during today's meeting: Mohammed presented the list of terms from the previous standard we would need for the case study he is working on. We discussed them and some corrections were proposed by the rest of the members.

Next meeting's topic: nomination of presentation

- Alaa [next weeks] - (potentially) JIT model
- [Next official meeting] Mohammed will present some queries over the knowledge base we can do to use the answers in a task and motion planning application

Minutes for the Official Meeting on May 7, 2020

Alberto Olivares-Alarcos transcribing

New business/announcements/events/last thoughts

- Found Patent from Magazino (see [here](#)) - Howard working on it
- **[CANCELLED - It will be online]** IEEE-SA board's meeting in Berlin June 1-3, it overlaps ICRA.
- Next official meeting for June 4

Close meeting (Howard)

Adjourned 2:30 PM UTC
