9. Structural review of P7003

I. How to improve monthly call scheduling for global participation
Ansgar highlighted that due to our meeting times we get very limited participation from other timezones. He suggested that we alternate calls that are good for one group, then the other, with mid-term calls for the other group, each month. Alternatively, we could alternate more significantly out current 3 times rotation. Clare pointed out that the culture section alternates between 9am and 5pm which seems to work quite well. Julian pointed out that the ISO meetings cycle between 0500, 1300, and 2100 UTC. Suggestion to try the ISO pattern. Thursdays still remain ok for the group.

II. Scheduling of a full day group working call
To go to ballot in April the standard needs to be a bit beyond the level that we’ve seen today, so that we are happy that we have included all the parts that need to be part of the standard. Some sections need some concentrated effort. Definitions need clearing up. Appropriate style needs checking throughout. Agreement on all of the content by end of February, so maybe meeting in mid-February. Need for offline work to happen in the interim. Clare suggested that perhaps we could go over the sections that are nearly done in January which might help the sections that have more to do, as they’ll have examples and stimulus to finish too. Ansgar will recirculate whole document in January so we’ll see where we stand.
