9 OTHER PAR ACTIVITY

9.1 P3337 – Standard for Intelligent Power, Security, Connectivity (IPSC) for Wellness

The SC has been requested to be co-standard committee. It was agreed that P3337 would proceed to NesCom without SSIT-SC co-standards committee due timing constraints. SSIT-SC to review the approved version and vote to be added as co-standards committee. Chair reported that this PAR was rejected at NesCom meeting in December 2022. *NesCom Administrator has approached SSIT-SC to assist in the rewriting of this PAR.*

11 BUSINESS ARISING FROM PREVIOUS MEETINGS

11.1 BoG AI Policy Question

In previous SC meeting the question was raised about society's acceptance of the introduction of GENERAL AI.

To clarify the issue, the types of AI need to be defined. One set of AI definitions are:

- **Reactive** – has no memory, only response to different stimuli
- **Limited memory** – uses memory to learn and improve its responses.
- **Theory of mind** – understands the needs of other intelligent entities.
- **Self-aware** – has human -like intelligence and self-awareness.

The question was asked: Does SSIT have a view/position on the introduction of self-aware AI into society? Is it a part of SSIT's mandate to encourage (implicitly or explicitly) the development of self-aware AI without consensus building on its value added for society.

Chair raised this issue with President of SSIT and received the following response:

SSIT as an organization does not have a position on General AI (which I take to be equivalent to Artificial General Intelligence). But we have members who are interested in the topic and its specifics, and I'm sure these members hold strong and sometimes divergent opinions. It is part of SSIT's mandate to encourage critical and constructive discussion of topics like General AI, not to advocate for it blindly (or even with eyes open). – Clint

This item is now completed.

11.2 IEEE SA and ISO Interactions

The question was raised about the influence that the ISO should have on IEEE standards. [Ruth to follow general question with SSIT and SA management about when the Working Group should approach ISO for adoption, and who should make this approach?](#) In addition, this question should cover when to refer to ISO/IEC standards with the IEEE standard. This question has been raised by Karen of P7014 and Lisa of P7012.

11.3 Website

Review deferred to the next meeting. [Chair to review home page content, to mention more PARs.](#)
